Senior Frontend Engineer building scalable, high-performance web platforms using React, Next.js, TurboRepo, and modern architecture. Full-stack capable with experience in Node.js and Database Management Systems, focusing on clean architecture and system design.

Work Experience

Senior Front End Engineer **Vodafone** **Mar 2024 - present**

- Built Vodafone's Fiber Eligibility Tool used by 1M+ users/month, boosting conversion by 18% and engagement by 25%.
- Optimized build system with TurboRepo + pnpm, cutting builds by 50%.
- Architected Micro Frontend system enabling parallel feature development across teams.

Front End Engineer **SportServe** **Dec 2021 - Feb 2024**

- Rebuilt sportsbook platform in Next.js & TypeScript, improving load times by 50% and reliability for thousands of users.
- Designed modular UI architecture with Tailwind + Redux, improving scalability and dev speed.
- Led Scrum for a 9-member cross-functional team, maintaining 100% sprint delivery rate.

Front End Engineer **Netcompany Intrasoft Intl** **Jan 2021 - Dec 2021**

- Developed tax administration platform with React and TypeScript serving thousands of daily users.
- Automated migration of JSON schemas to SQL with Node.js, saving 40+ dev hours/week.
- Established scalable front-end architecture and coding standards for long-term maintainability.
